Hindi 

## PROFILE

Proficient in Swift programming language with a track record of developing and maintaining successful applications. Leveraged Swift's robust features to create user-friendly and performant iOS applications, ensuring seamless functionality and a positive user experience. Demonstrated expertise in coding, debugging, and optimizing Swift-based projects, resulting in efficient and reliable software solutions.

## WORK EXPERIENCE

### Junior iOS Developer

Webgrity

Aug 2022 - Jul 2023

- Developed and maintained iOS applications using Swift programming language, ensuring high-quality code and optimal performance.
- Successfully implemented CSS and JavaScript in an iOS app to create an innovative e-book reading application, enhancing user engagement and satisfaction.
- Integrated and utilized third-party SDKs efficiently by leveraging Cocoapods, resulting in improved features and functionality in the applications.
- Implemented Multipeer Connectivity in iOS, enabling seamless peer-to-peer communication and collaboration features within applications.
- Successfully integrated Socket.IO for real-time chat functionality within iOS applications, facilitating seamless and interactive communication features.

### Junior iOS Developer

Vareli Tecnac Pvt. Ltd.

Jul 2023 - Present

- I created many iOS apps here right from the scratch.
- Successfully published multiple applications on the App Store.
- Added a cool feature that lets you scan QR codes in the apps.
- Implemented Local Notification.
- I used a technology called Core Location to include features related to your location in some of the apps.
- I worked closely with design and backend teams to make the apps look good and work smoothly.
